

V L A D H I R N Y K

.NET C# DEVELOPER

.NET C# developer based in Kyiv, Ukraine. Currently pursuing a degree in Software Engineering at the State University of Trade and Economics.

PROFILE

My name is Vlad Hirnyk, a 22-year-old C#/.NET developer from Kyiv, Ukraine. I'm a beginner excited to grow in development.

With a foundation in C#, JavaScript, and R, I'm eager to apply my skills to real-world projects. My interests include building efficient backend systems, exploring modern web tech, and working on desktop applications.

PERSONAL PROJECTS

Double You - Words for everyone

This educational app is designed to help users expand their English vocabulary. It offers a selection of commonly used and essential words for learning, complete with translations. Users can track their progress, create backups, and customize their preferences with various themes to receive personalized word suggestions

E-Commerce TG Bot with CRM Features

A multi-functional Telegram bot for e-commerce, featuring a product catalog, order management, store location search on a map, feedback collection, order history, and a web admin panel for managing products and bot settings. Developed using .NET Core and the Telegram.Bot library, it leverages PostgreSQL, Redis, Nginx, and Docker for backend infrastructure, all deployed on the Azure cloud platform. The web client is built with React
